

WE ARE HIRING

JOIN OUR TEAM

Executive

Research & Development (R&D & Pre seals)

Job Responsibilities:

- ✔ Design intuitive and user-friendly UI/UX using Figma for web and mobile applications.
- ✔ Develop responsive front-end interfaces using HTML5, CSS3, JavaScript, and React.js.
- ✔ Integrate RESTful APIs with front-end applications to ensure seamless communication between client and server.
- ✔ Implement and maintain front-end components for both Python- and Laravel-based projects.
- ✔ Design, develop, and customize PDF templates and reports within application systems.
- ✔ Improve and maintain the overall user interface and user experience across ongoing projects.
- ✔ Ensure responsive design, cross-browser compatibility, and optimized application performance.
- ✔ Collaborate with backend developers and project stakeholders to deliver high-quality software solutions.
- ✔ Design mobile application interfaces and create consistent, modern, and user-friendly UI experiences.
- ✔ Identify and resolve front-end issues while continuously enhancing application usability and visual consistency.
- ✔ Maintain design standards and ensure a consistent look and feel across all company products and platforms.

Requirements:

- ✔ Bachelor's degree in Computer Science & Engineering (CSE), Software Engineering, Information Technology (IT), or a related field.
- ✔ 1.5 years of experience in UI/UX design and Front-End Development.
- ✔ Hands-on experience with Figma, HTML5, CSS3, JavaScript, React.js, and RESTful API integration.
- ✔ Experience working with Python- and Laravel-based applications will be an added advantage.

What We Offer:

- ✔ Competitive remuneration.
- ✔ Festival bonuses.
- ✔ Professional development and growth opportunities
