

We're Hiring

Data Analyst

Location: HQ (Dhaka)

Deadline: Urgent — Apply Immediately

Advanced Excel is mandatory.

About the Opportunity:

We are looking for data analysts who must be willing to keep abreast of industry innovations and trends. Using the latest analytic tools and processes, we're able to maximize our offerings and deliver unparalleled service and support. To help carry us even further, we're searching for data analysts to join our team.

Key Responsibilities:-

- ◆ Collect and clean data from various sources to ensure data quality and integrity.
- ◆ Conduct thorough data analysis using statistical methods and tools to identify trends and patterns.
- ◆ Create and maintain dashboards and reports to visualize data insights for stakeholders.
- ◆ Interpret and present data findings to support business decision-making processes.
- ◆ Collaborate with cross-functional teams to understand data requirements and deliver actionable insights.
- ◆ Utilize data analysis tools such as SQL, Excel, Python, and Tableau to perform analysis and create visualizations.
- ◆ Ensure data analysis processes comply with data protection regulations and organizational policies.
- ◆ Document data analysis methodologies, processes, and findings for future reference.
- ◆ Continuously improve data analysis processes and stay updated with industry trends and best practices.

Requirements:-

- ◆ At least 2 years
- ◆ Bachelor's degree in computer science, information management, statistics, or a comparable discipline is required, with prior experience in data analysis or a related field being advantageous.
- ◆ Possess a solid foundation in statistics and practical experience with statistical software (such as Excel, SPSS, and SAS) and mastery in data analysis languages including SQL, Python, and Power BI.

Compensation & Benefits: -

 Salary: BDT 35,000

 Two Festival Bonuses

 Mobile Allowance
