

Are you passionate about building mobile apps and eager to learn from real projects?

Join Akij iBOS Limited as a Mobile App Developer Intern and gain hands-on experience developing cross-platform apps using React Native for Android and iOS!

What You'll Do:

Assist in developing and maintaining mobile apps using React Native

Collaborate with designers and backend teams to build new features

Test, debug, and optimize app performance

Work with APIs and third-party integrations

Who Can Apply:

B.Sc. in CSE / Software Engineering / IT (Final-year or Fresh Graduates)

Basic knowledge of React Native, JavaScript, or TypeScript

Familiarity with mobile UI design and REST APIs

Eagerness to learn and grow in a fast-paced development team

What You'll Get:

Mentorship from experienced developers

Real project experience on production apps

Opportunity for full-time employment based on performance
