6sense HQ Limited

Junior Frontend Developer – Job Description

About 6sense HQ Limited

6sense HQ Limited is an innovative software company with a diverse international client base and a team of expert developers. We specialize in web development, managed delivery, custom software development, dedicated team solutions, and UX design. We are now looking for a skilled Junior Frontend Developer to join our Engineering team and contribute to production-grade projects.

Position: Junior Frontend Engineer

Apply Now: https://lnkd.in/gRhDJwzc

- Position: Junior Frontend Developer
- Department: Operations (Engineering)
- Experience Required: Minimum 1+ year
- Employment Type: Full-time
- Vacancy: 1-2

Requirements:

- Minimum 1 year of hands-on experience building and shipping production-level web applications.
- Strong proficiency in HTML, CSS, JavaScript, and React (Next.js experience preferred).
- Solid understanding of responsive UI development and component-based architecture.
- Experience integrating RESTful APIs and working with common frontend libraries/frameworks.
- Familiarity with state management tools (React Query, Redux, Zustand, etc).
- Good understanding of version control workflows (Git, GitHub/GitLab).
- Ability to write clean, maintainable, scalable code.
- Strong problem-solving skills (ACM/competitive programming background is a plus, not mandatory).
- Ability to communicate effectively in English (written & spoken).
- Bachelor's degree in Computer Science/Engineering or relevant field from any reputed local or foreign university.

Responsibilities:

- Develop high-quality, production-ready UIs for web applications.
- Convert Figma/UX designs into fully responsive, pixel-perfect React components.
- Consume & integrate internal and third-party APIs.
- Collaborate with backend engineers to deliver end-to-end features.
- Write optimized, reusable components with best practices and coding standards.
- Participate in code reviews, version control workflows, and sprint planning.
- Identify performance issues and help improve UI speed, accessibility, and maintainability.
- Work closely with project managers and designers to deliver features on time.

Compensation & Growth Opportunities:

- Monthly Salary: BDT 35,000 – 45,000 (based on experience and capability)
- Work with senior frontend and backend developers in a fast-paced engineering environment.
- Opportunity to work on international, production-level projects.
- Hands-on experience with modern tools like Next.js, React Query, Tailwind, and CI/CD workflows.
- Learn how real engineering teams handle scaling, optimization, deployment, and code quality.

What we offer:
- Two Annual Festival Bonuses
- Mid Year Performance Bonus
- Health Insurance
- Maternity & Paternity Leave
- Additional Benefits as per Company Policy

Office Hours: 10 AM – 7 PM (Monday – Friday)

Job Location: House: 15, Road: 04, Block: G, Banasree, Rampura, Dhaka
