Semester	Course Title	Fees
1	 UNIX Essentials and Intermediate System Administration Using Solaris OS (Batch 06) Description: This course will prepare students for the Sun Certified System Administrator (SCSA) Part I Exam. This course gives you direct experience with the most essential system administration tasks in the Solaris OE. You will be instructed in crucial system management skills including: managing local disk devices, managing UFS file systems, installing and removing Solaris packages and patches, performing system boot procedures. The course also covers user and security administration, managing network printers and system processes, and performing system backups and restores. Class starts on: 01/06/2008 Duration: 6 Weeks, Class Schedule: (Sun, Tues) day-6.00pm-9.00pm	10,000
2	 Advanced System Administration Using Solaris OS (Batch 01) Description: This course will prepare students for the Sun Certified System Administrator (SCSA) Part II Exam. This course provides students with the necessary knowledge and skills to perform advanced tasks in the Solaris OS on both Sparc and x64/x86 platforms, including network basics, managing virtual file systems and core dumps, managing storage volumes, controlling access and configure system messaging, setting up naming services, and performing installation procedures. Class starts on: 02/06/2008 Duration: 6 Weeks, Class Schedule: (Mon, Wed) day-6.00pm-9.00pm	10,000
3	 Network Administration Using Solaris OS Description: This course will prepare students for the Sun Certified Network Administrator (SCNA) Exam. This course provides students with instruction in performing network administration tasks, such as configuration and troubleshooting local area networks (LANs). This course also provides hands-on experience with topics such as Internet Protocol (IP) routing, Domain Name System (DNS), Dynamic Host Configuration Protocol (DHCP), IP version 6 (IPv6), and the Solaris IP Filter firewall. Duration: 4 Weeks----- Not yet started	8,000
4	 Security Administration Using Solaris OS Description: This course will prepare students for the Sun Certified Security Administrator (SCSECA) Exam. This course provides students with extensive knowledge of Solaris OS security administration topics including: general security principles and features, hardening and minimization, principles of least privilege, cryptographic features, Kerberos, user account and password security, network security, auditing and zone security. Duration: 4 Weeks----- Not yet started	8,000
